Assist governors to enforce
most effective utility saving policy

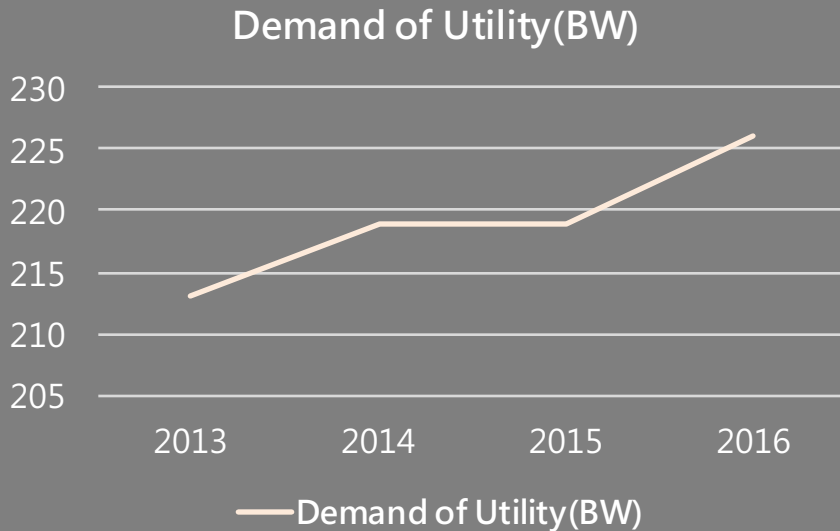

A Life is struggle product

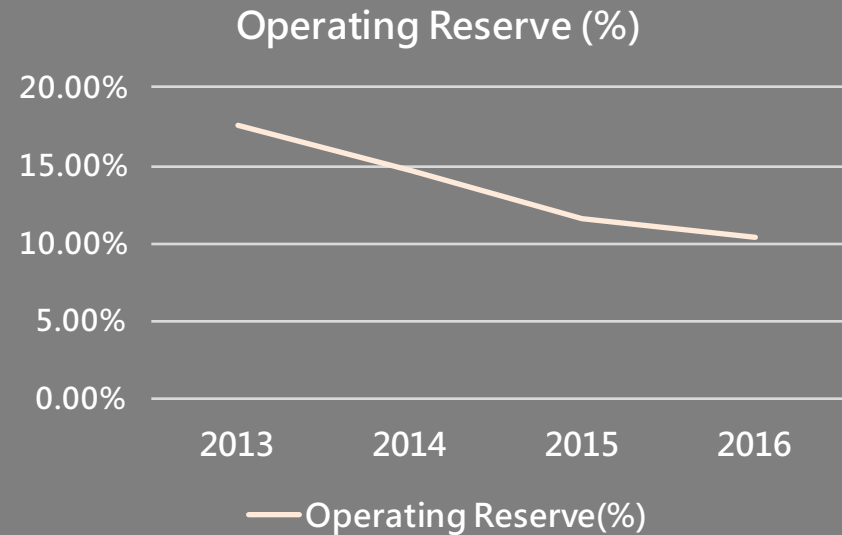

The Trends of Increasing Utility Demand and Decreasing Operating Reserve could lead to Utility Shortage

Total Demand of Utility*

(Nuclear power accounted for **14%** last year, which are going to be eliminated before 2025)

Operating Reserve of Utility*

(Taipower's Operating Reserve goal is **15%**)

Limited Decision Making Time and Incapability of Assessing the Outcome Precisely Lead to Inefficiency

Limited Decision Making Time

Most of the governors tend to make contributions in their term of office, so they are often urgent to make decisions as soon as possible

Incapability of Assessing the Outcome Precisely

Governors are incapable of setting the strategies by using replicable data-driven methodologies
